The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05
This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Facing Forward Sajitha Bashir, Marlaine Lockheed, Elizabeth Ninan, Jee-Peng Tan, 2018-09-20 *Facing Forward* lays out a range of policy and implementation actions that are needed for countries in Sub-Saharan Africa to meet the challenge of improving learning while expanding access and completion of basic education for all. The book underscores the importance of aligning the education system to be relentlessly focused on learning outcomes and to ensuring that all children have access to good schools, good learning materials and good teachers. It is unique in characterizing countries according to the challenges they faced in the 1990s and the educational progress they have made over the past 25 years, allowing countries in the region to learn from each other. The authors review the global literature and add to it by their extensive new analyses of multiple datasets from more than three dozen countries in the region. They integrate findings about what affects children's learning, their access to schooling and progress through basic education. The book draws lessons from the region and for the region about what works and what is needed to better implement what is known to have worked. The book examines four areas to help countries better align their systems to improve learning: 1. completing the unfinished agenda of reaching universal basic education with quality; 2. ensuring effective management and support of teachers; 3. targeting spending priorities and budget processes on improving quality; and 4. closing the institutional capacity gap. It concludes with an assessment of how future educational progress may be affected by projected fertility rates and economic growth.

After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.
