The Authors' Summer 2009 Foreword: Since its founding in 1875 the International Bureau of Weights and Measures BIPM has had a unique role in mass metrology. The definition of the kilogram depends on an artefact conserved and used within our laboratories. The mass embodied in this artefact defines the kilogram and this information is disseminated throughout the world to promote uniformity of measurements. Although the definition of the kilogram may change in the relatively near future reflecting the success of new technologies and new requirements, the task of ensuring world wide uniformity of mass measurements will remain.
