What makes Chrome, Firefox, and Safari the big three browsers, and why should I care? Is Internet Explorer still a good choice for Windows users? Spoiler: no. What about Microsoft Edge? When should I consider less popular browsers such as Brave, Opera, Tor, and Vivaldi? What are my options if I accidentally close a tab or window, or lots of them in my browser? How do I address the common problem of tab overload? What are the quickest ways to navigate through browser tabs and windows? Are bookmarks even a thing anymore? Should I use them always, never, or only on occasion? Which search engine should I use, and how can I find exactly what I'm looking for in a web search? How can I protect my privacy and security while browsing the web? How do web cookies work, and what can I do to block the ones I don't want? Is there some way to stop the endless curse of autoplaying video? Are private browsing modes truly private? How can I safely make purchases in my browser? My browser is doing something annoying: autoplaying videos, showing tons of ads, pestering me with notifications, etc. How can I fix it? What can I do if a page just won't load properly? Are there any tricks I can use to make my web browsing quicker and more efficient? Yes. Should I be using extensions to add features to my browser? If so, which ones? How can I sync my books?
