Global Governance and Interaction between International Institutions Alexander Libman, Anastassia Obydenkova, 2023-09-26. This book builds on theory of authoritarian regionalism and is the first attempt to analyse the interaction of authoritarian regional organizations in Eurasia with their global and regional counterparts NATO EU WTO IMF etc. It analyses three decades of the development of post Soviet regional organizations prior to the tectonic geopolitical and security changes of 2022. Eurasian regional organizations created by Russia have been frequently perceived as attempts to establish alternatives to the global governance institutions and to compete with other regional organizations like for example the European Union EU. They are seen as a pronounced example of authoritarian regionalism i e regional organizations established by non democracies. The way they interact with global and regional institutions has however remained understudied. This book aims to close this gap. It places Eurasia within a global context and considers similar trends world wide as well as outlines the agenda for future studies of global versus regional governance. The book sheds light on long term strategies of Russia in Eurasia in global economy and in world politics and on the interaction between Russia and other post Soviet states. With an extended introduction and conclusion this book is an insightful resource for scholars advanced students and researchers of politics international relations and Eurasian area studies. The chapters in this book were originally published as a special issue of Post Communist Economies    *Ecological Restoration Law* Afshin Akhtar-Khavari, Benjamin J. Richardson, 2019-01-25. Ecological restoration is as essential as sustainable development for the health of the biosphere. Restoration however has been a low priority of most countries environmental laws which tend to focus narrowly on rehabilitation of small discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes. Through critical theoretical perspectives and topical case studies this book's diverse contributors explore a more ambitious agenda for ecological restoration law. Not only do they investigate current laws and other governance mechanisms they also consider the

philosophical and methodological bases for the law to take ecological restoration more seriously Through exploration of themes relating to time space geography semiotics social justice and scientific knowledge this book offers innovative and critical insights into ecological restoration law    **Energy Research Abstracts** ,1978    **Canadian Periodical Index** ,1996    **Yearbook of International Organizations 2014-2015 (Volume 4)** Union Of International Associations,Union of International Associations,2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and acitvities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations
