Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction **Teaching Mathematics Creatively** Linda Pound, Trisha Lee, 2021-09-30 This revised and updated third edition offers a range of strategies activities and ideas to bring mathematics to life in the primary classroom Taking an innovative and playful approach to maths teaching this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge understanding and enjoyment of the subject In the creative classroom mathematics becomes a tool to build confidence develop problem solving skills and motivate children The fresh approaches explored in this book include a range of activities such as storytelling music and construction elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way Key chapters of this book explore Learning maths outdoors make more noise make more mess or work on a larger scale Everyday maths making sense of the numbers patterns shapes and measures children see around them Music and maths the role of rhythm in learning and music and pattern in maths Stimulating accessible and underpinned by the latest research and theory this is essential reading for trainee and

practising teachers who wish to embed creative approaches to maths teaching in their classroom *Women's Under-Representation in the Engineering and Computing Professions: Fresh Perspectives on a Complex Problem* Kathleen Buse, Catherine Hill, Romila Singh, 2018-06-21 Understanding the many complexities that define gender inequality has been described by researchers as a grand challenge. Novel insights, innovation, a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal. As such, this Research Topic in *Frontiers in Psychology* addresses the underrepresentation of women in engineering and computing as a complex but solvable problem. This Research Topic seeks to inform the global community about advances in understanding the underrepresentation of women in engineering and computing with a focus on what enables change. Further, this Topic will promote fresh perspectives, innovative methodologies, and mixed method approaches important to accelerating the pace of change. *The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces*, 1893 [The Routledge Handbook of Religion, Politics and Ideology](#) Jeffrey Haynes, 2021-08-14 This comprehensive handbook examines relationships between religion, politics, and ideology with a focus on several world religions: Christianity, Islam, Buddhism, Hinduism, and Judaism in a variety of contexts, regions, and countries. Relationships between religion, politics, and ideology help mould people's attitudes about the way that political systems both domestically and internationally are organised and operate. While conceptually separate, religion, politics, and ideology often become intertwined, and as a result, their relationships evolve over time. This volume brings together a number of expert contributors who explore a wide range of topical and controversial issues, including gender, nationalism, communism, fascism, populism, and Islamism. Such topics inform the overall aim of the handbook: to provide a comprehensive summary of the relationships between religion, politics, and ideology, including basic issues and new approaches. This handbook is a major research resource for students, researchers, and professionals from various disciplinary backgrounds, including religious studies, political science, international relations, and sociology. **The National Stockman and Farmer**, 1922 **Country Life**, 1959 *The Publishers Weekly*, 1974-07 *Cumulative Author Index to Psychological Abstracts*, 1978 **Engineered Materials Abstracts**, 1986-10 **Guide to Microforms in Print**, 1995 *Books In Print 2004-2005* Ed Bowker, Staff Bowker, Ed, 2004 *Minneapolis City Directory*, 1938 **The Continuing Study of Newspaper Reading** Advertising Research Foundation, 1943 [Author Index to Psychological Index, 1894 to 1935, and Psychological Abstracts, 1927 to 1958](#) Columbia University.
