Transformations in Urban Education Urban Teachers and Students Working Collaboratively addresses pressing problems in
urban education contextualized in research in New York City and nearby school districts on the Northeast Coast of the
United States The schools and institutions involved in empirical studies range from elementary through college and include
public and private schools alternative schools for dropouts and museums Difference is regarded as a resource for learning
and equity issues are examined in terms of race ethnicity language proficiency designation as special education and gender
The contexts for research on teaching and learning involve science mathematics uses of technology literacy and writing
comic books A dual focus addresses research on teaching and learning and learning to teach in urban schools Collaborative
activities addressed explicitly are teachers and students enacting roles of researchers in their own classrooms cogenerative
dialogues as activities to allow teachers and students to learn about one another's cultures and express their perspectives on
their experienced realities and negotiate shared recommendations for changes to enacted curricula Coteaching is also
examined as a means of learning to teach teaching and learning and undertaking research The scholarship presented in the
constituent chapters is diverse reflecting multi logicity within sociocultural frameworks that include cultural sociology
cultural historical activity theory prosody sense of place and hermeneutic phenomenology Methodologies employed in the
research include narratology interpretive reflexive and authentic inquiry and multi level inquiries of video resources
combined with interpretive analyses of social artifacts selected from learning environments This edited volume provides
insights into research of places in which social life is enacted as if there were no research being undertaken The research
was intended to improve practice Teachers and learners as research participants were primarily concerned with teaching
and learning and as a consequence as we learned from research participants were made aware of what we learned the
purpose being to improve learning environments Accordingly research designs are contingent on what happens and
emergent in that what we learned changed what happened and expanded possibilities to research and learn about
transformation through heightening participants awareness about possibilities for change and developing interventions to
