Managerial Accounting Irvin N. Gleim,Terry L. Campbell,1988 **Accounting, the Social and the Political** Norman B. Macintosh,Trevor Hopper,2005-09-30 This book contains 35 carefully selected and abridged versions of scholarly financial and managerial research articles by world class researchers ranging across a wide spectrum of the social political and

philosophical sides of financial and managerial accounting information and practices to focus on accounting's wider role and impact on organizations and society at large. While each article was substantially culled in order to highlight its central findings and its unique approach, care was exercised to maintain the integrity of the authors' work. The result is a collection of readily accessible research including classics and seminal articles, a selection of more contemporary articles and recent articles that go beyond the conventional. Thus the book pushes the boundaries beyond that of conventional accounting thought and research. This anthology will be of interest especially to graduate students since it provides a broad sampling of influential research studies presented in a highly accessible format. It should also be of vital interest to sophisticated practitioners who are concerned about the current state of the accounting world in the wake of the recent cascade of so-called accounting scandals. The hope also is to help bridge the gap between the practitioners and the scholarly researchers.
