English Grade 9 Common Paper 2013 November:

The Education Invasion Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls. But it had been creeping into schools nationwide over the previous three years and children were feeling its effects. They cried over math homework so mystifying their parents could not help them even in elementary school. They read motley assortments of informational text instead of classic literature. They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms. How did this latest and most sweeping reform of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it. Why then was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self governance in education so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? *The Education Invasion* offers answers and remedies.

Caribbean Children's Literature, Volume 1 Betsy Nies, Melissa García Vega, 2023-05-18 Contributions by Mar a V Acevedo Aquino Consuella Bennett Florencia V Cornet Stacy Ann Creech Zeila Frade Melissa García Vega Ann González Louise Hardwick Barbara Lalla Megan Jeanette Myers Betsy Nies Karen Sanderson Cole Karen Sands O'Connor Geraldine Elizabeth Skeete and Aisha T. Spencer. The world of Caribbean children's literature finds its roots in folktales and storytelling. As countries distanced themselves from former colonial powers post 1950s the field has taken a new turn that emerges not just from writers within the region but also from those of its diaspora. Rich in language diversity and history, contemporary Caribbean children's literature offers a window into the ongoing representations of not only local realities but also the fantasies that structure the genre itself. Young adult literature entered the region in the 1970s offering much needed representations of teenage voices and concerns. With the growth of local competitions and publishing awards the genre has gained momentum providing a new field of scholarly analyses. Similarly the field of picture books has also deepened. Caribbean Children's Literature Volume 1: History, Pedagogy, and Publishing includes general coverage of children's literary history in the regions where the four major colonial powers have left their imprint, addresses intersections between pedagogy and children's literature in the Anglophone Caribbean, explores the challenges of producing and publishing picture books, and engages with local authors familiar with the terrain. Local writers come together to discuss writerly concerns and publishing challenges. In new interviews conducted for this volume, international authors Edwidge Danticat, Junot Díaz, and Olive Senior

discuss their transition from writing for adults to creating picture books for children

The School Reform Landscape Reloaded Christopher H. Tienken, 2020-10-30 The School Reform Landscape Reloaded: More Fear, Myths and Lies peels back the curtain of school reform to examine the tensions that exist between the democratic and equitable system of public education and the emerging dual system based on elite interests aimed at profit making and decreasing education equity. The author takes an in-depth and controversial look at school reform since the launch of Sputnik I. Education reform events, proposals and policies are examined through the lens of progressivist philosophy and critical social theory. Some of the issues and policies critiqued include the neoliberal corporate influence on education, the Sputnik myth, A Nation At Risk, standardization, charter schools and other relevant topics. The author provides an evidence-based view of the free market reform ideas and pierces the veil of the new reform policies to find that they are not built upon empirical evidence but instead rest solidly on foundations of myth, fear and lies. Ideas for a new set of reform policies based on empirical evidence and supportive of a unitary, equitable and democratic system of education are presented.
