the Math Mammoth Grade 4 complete curriculum This book covers division geometry fractions and decimals The worktext  
contains both the necessary instruction and the problems and exercises the text and the work thus a worktext and is for the  
most part self teaching Please note this is a student worktext and does not contain the answers The answer key book is

understand the maths not just learn HOW to do it Concepts are often explained with visual models followed by exercises  
using those models These visual models can take the place of manipulatives for many children however it is very easy to add  
corresponding manipulatives to the lessons if so desired The curriculum is mastery oriented This means it concentrates fairly  
long on a topic delving into its various aspects This promotes conceptual understanding as opposed to spiral curricula that  
often tend to jump from topic to topic too much There is a strong emphasis on mental maths and number sense It requires  
very little teacher preparation which is a big help to most parents The curriculum has no separate teacher's manual nor is it  
scripted The introduction to each chapter has some notes for the teacher concerning the material in the chapter All the  
instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see  
Maria herself teach the material After each chapter introduction you will find a list of Internet links and resources games
