**Bird Strike** Reza Hedayati, Mojtaba Sadighi, 2015-09-06 Bird strikes are one of the most dangerous threats to civil and military flight safety between 1960 and 2014 they were responsible for the destruction of approximately 150 civil aircraft and the deaths of 271 people Bird Strike presents a summary of the damage imposed on the aviation industries by their avian counterparts This book first presents and analyzes the statistics obtained from bird strike databases and offers various methods for minimizing the overall

probability of bird strike events. The next chapters explore how to analyze the ability of aero engine critical structures to withstand bird strike events by implementing reliable experimental, theoretical and numerical methods. Finally the book investigates the impact of bird strikes on different components of aircrafts such as the metal fuselage, composite fuselage, engines, wings and tail and proposes two new bird models with explanations of their use. Provides up to date information for aviation staff and researchers working on aircraft safety. Offers comprehensive investigations on all the statistical, theoretical, experimental and numerical aspects of bird strike. Includes studies carried out on bird strike and provides the reader with the important findings of each paper. Evaluation of LS-DYNA Wood Material Model 143 Y. D. Murray, 2005

**Evaluation of LS-DYNA Concrete Material Model 159** Yvonne D. Murray, 2007 An elasto plastic damage model with rate effects was developed for concrete and implemented into LS-DYNA a commercially available finite element code. This manual documents the theory of the concrete material model, describes the required input format and includes example problems for use as a learning tool. A default material property input option is provided for normal strength concrete. The model was developed for roadside safety applications such as concrete bridge rails and portable barriers impacted by vehicles but it should also be applicable to other dynamic applications. The companion report to this manual is entitled Users manual for LS-DYNA concrete material model 159 FHWA HRT 05-062.
