Poleschuk, 2001 Dealing mainly with means of creating automated workstations or CAD systems based on the AutoCAD system this text analyzes the problem of adapting a workplace to fit the concrete plans of the designer from a number of angles and provides a detailed description of the AutoLISP language. Methods for working in a Visual LISP environment which allows you to compile and debug programs written in AutoLISP are provided. And methods for creating user menus including pull down menus, context menus, on screen menus and toolbars and for planning dialog boxes in applications are thoroughly examined. Key features include a discussion of typical designing and programming tasks of AutoCAD developers and essential problem solving information and useable example codes, a detailed review of the AutoLISP programming language, use of the Diesel language to create all necessary control elements for user menus and practical concise real world advice and examples.

AutoCAD Platform Customization Lee

Ambrosius, 2015-04-14 Take control of AutoCAD for a more efficient streamlined workflow. AutoCAD Platform Customization is the most comprehensive guide to streamlining and personalizing the AutoCAD platform. The AutoLISP and VBA programming languages open up a myriad of customization options and this book provides expert guidance toward applying them to AutoCAD Civil 3D, Plant 3D and other programs based on the Autodesk AutoCAD platform. Detailed discussions backed by real world examples and step by step tutorials provide user friendly instruction and downloadable datasets allow for hands on learning. Through customization you can increase screen real estate, streamline workflows and create more accurate drawings by unleashing powerful programming languages that allow the user to command the software how to work instead of the other way around. AutoCAD customization is commonly performed by system administrators and CAD managers but senior drafters and savvy users are increasingly taking customization into their own hands. AutoLISP and VBA are two popular and versatile tools that allow for going beyond the boundaries of normal user interface customization options allowing users to enforce drawing and CAD standards and automate repetitive tasks. Customize the workspace including tool sets, ribbon tabs and panels and palettes. Modify graphical objects, set system variables, integrate with external software and more. Manage blocks, change the interface, create dialog boxes and communicate with Microsoft Office applications. The ideal design environment puts the tools you need right at your fingertips, removes unnecessary steps and fosters precision through good communication. Customizing including applying AutoLISP and VBA to AutoCAD enables all of this and much more. For the designer who needs to work smarter because it's impossible to work any harder, AutoCAD Platform Customization provides the key information, insight and techniques that will help to increase your productivity with AutoCAD.
