## **Explain The Differences Between Nfsas And Funza Lushaka:**

*Faculty Perspectives on Vocational Training in South Africa* Eunice Ivala, Chaunda Scott, 2019-03-06 The Cape Peninsula University of Technology CPUT is one of four Universities of Technology established by the South African government in 2005 with a focus on vocational training. This book presents faculty experiences of CPUT's innovative work integrated learning and teaching model as well as findings from practice based research being done in the institution. The purpose of this volume is to be a resource for other institutions in South Africa that wish to try similar strategies as well as to trigger a community of practice with vocationally oriented institutions outside of South Africa. *ETDP SETA Scarce & Critical Skills Guide 2010/11*, *Low-Income Students, Human Development and Higher Education in South Africa* Melanie Walker, Monica McLean, 2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of inclusive learning outcomes to encompass the multi dimensional value of a university education and a plurality of valued cognitive and non cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi dimensional so that they can result in functionings in all areas of life as well as work and future study. The inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed. *Low Income Students Human Development and Higher Education in South Africa* makes an original contribution to capabilitarian scholarship conceptually in theorising a South based multi dimensional student well being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capabilitarian scholars, practitioners and policy makers.
