

SCRIPTS

Scripts are small programs written to perform one or more tasks in InDesign in an automated or semi-automatic way. Adobe InDesign supports AppleScript (Mac), JavaScript (Mac and PC) and VisualBasic (PC).

Scripts

Adobe supplies a series of Scripts with Adobe InDesign that can be installed at leisure. These scripts are not installed by default, but can be found on the InDesign installer/resources CDs. In addition many people writing scripts share their scripts publicly on the Adobe Studio Exchange: <http://share.studio.adobe.com/>. Register an *Adobe ID* and select a password in order to download shared files.

WEB link

Installing scripts

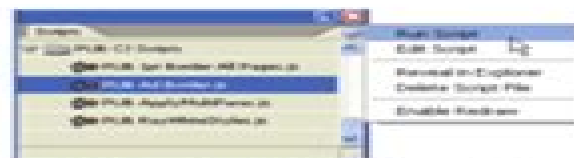

To install a script for use in InDesign, copy the script file to the following location:

- Mac** Macintosh HD (or name of disk containing your applications folder)
 Applications / Adobe InDesign CS2 / Presets / Scripts
- PC** My Computer ... (C:) drive (or name of disk containing your program files folder)
 Program Files / Adobe / Adobe InDesign CS2 / Presets / Scripts

If you have a larger group of scripts it might be an idea to organise your scripts in sub-folders. The Script palette lists the folders and when the folder is expanded (click the expand triangle to the left of the folder icon) the scripts contained in the folder become accessible.

Running scripts

To have a script perform a series of actions that have been programmed, the script must be run. To run a script launch the *Scripts palette (Window > Automation)*, then scroll to the relevant script and double click the script name or select *Run Script* from the Script palette fly-out menu.

Scripts palette (Window > Automation).

Some scripts will perform an action fully automatic, whilst others might require the entry of details in a dialog box. Most script authors will add some descriptive text at the beginning of the script text outlining how the scripts are to be used.
