Event Management: For Tourism, Cultural, Business and Sporting Events Lynn Van der Wagen, Lauren White, 2018-04-01 Event Management specifically written for the Diploma of Event Management and Advanced Diploma of Event Management is a comprehensive resource for anyone wanting to build their expertise in professional event management. This edition adopts a scaffold learning pedagogy helping students move through the material logically and efficiently while building on their understanding of tourism, cultural, business and sporting events. *Events Feasibility and Development* William O'Toole, 2021-12-13. Events Feasibility and Development From Strategy to Operations 2nd Edition outlines the best practice in event development and the global events sector. Tools and techniques from the first edition have been refined and expanded through their use in over 20 countries including the USA, France, UAE, Malaysia and South Africa. These include strategy development and implementation, asset management, portfolio management, return on investment management, process mapping and the feasibility study. Fascinating current examples illustrate these professional management techniques. The second edition elaborates on the events sector maturity model as a measurement tool for cities, regions and countries. This has been tried and successfully tested in developing economies and assisted in the rapid development and sustainability of events in Dubai and many other destinations. Each chapter contains exhibits, questions, bullet points and clear explanations of the tools and techniques. Brand new material includes a full explanation of the maturity model including post pandemic solutions. New case studies and exhibits. A new section on teaching and training in event management. The chapters are fully supported by further current case studies and examples on the publisher's and the author's website. Online material also includes 11 lesson plans for a semester course containing assessment items, learning objectives and teaching tips for each topic and event photos and author videos explaining the topics. This will be essential reading for all students of Event Management.

COBOL and Visual Basic on .NET Chris L. Richardson, 2013-11-09. This is a comprehensive .NET retraining guide written for the COBOL CICS mainframe programmer from the perspective of a former COBOL CICS programmer. *Small Unmanned Fixed-wing Aircraft Design* Andrew J. Keane, András Sóbester, James P. Scanlan, 2017-08-17. Small Unmanned Fixed-wing Aircraft Design is the essential guide to designing, building and testing fixed-wing UAVs or drones. It deals with aircraft from two to 150 kg in weight and is based on the first-hand experiences of the world-renowned UAV team at the UK's University of Southampton. The book covers both the practical aspects of designing, manufacturing and flight testing and outlines the essential calculations needed to underpin successful designs. It describes the entire process of UAV design from requirements definition to configuration, layout and sizing through preliminary design and analysis using simple panel codes and spreadsheets to full CFD and FEA models and on to detailed design with parametric CAD tools. Its focus is on modest cost approaches that draw heavily on the latest digital design and manufacturing methods, including a strong emphasis on utilizing off-the-shelf components, low-cost analysis, automated geometry modelling and 3D

printing It deliberately avoids a deep theoretical coverage of aerodynamics or structural mechanics rather it provides a design team with sufficient insights and guidance to get the essentials undertaken more pragmatically The book contains many all colour illustrations of the dozens of aircraft built by the authors and their students over the last ten years giving much detailed information on what works best It is predominantly aimed at under graduate and MSc level student design and build projects but will be of interest to anyone engaged in the practical problems of getting quite complex unmanned aircraft flying It should also appeal to the more sophisticated aero modeller and those engaged on research based around fixed wing UAVs [Mike Meyers' CompTIA Network+ Guide to Managing and Troubleshooting Networks Lab Manual, Fourth Edition \(Exam N10-006\)](#) Mike Meyers, Jonathan S.
