## User Manual

'EUROSEC E50' is up-to-date vehicle alarm system designed for users looking for quality and appreciating their time. System generates secure variable code and functions in conformity to requirements of EU Directives. EUROSEC E50 is distinguished not only by the reliable engine immobilization preventing vehicle theft but also by possibility of turning the alarm OFF by means of adjustable PIN code. This is extremely handy when facing remote control loss, for example during some travel or when the remote control battery is low.

### 1. SYSTEM UNIT

System unit performs main security functions, thus it is extremely important to hide it well in the passenger compartment of a vehicle. After the installation of the system unit all system settings and pre-programming of the new remote-controls is done by using the PIN code. Manufacturer supplies alarm system with default 4-digit PIN code (Fig. 1) that can be found on the identification label of alarm system (Fig. 2). Afterwards the user should change it into some other easy memorable 4-digit number. It is recommended to write down the new PIN code, however do not keep this information in your vehicle. In addition, do not use your birthday date or home address for the PIN code.

### 2. REMOTE CONTROL

The system comes with 2 remote controls (radio transmitters) (Fig. 3 and Fig. 4) though it is possible to program up to 5 remote controls (see sections 4-4.1). It is recommended to replace remote control battery after every 12 months. All types of 33A batteries (12V) are eligible for use. Though remote control casing ensures protection of inside electronics from moisture, dipping of remote control device into water is not allowed under any circumstances.
