*Integrated Organic Farming Systems: Approach for Efficient Food Production and Environmental Sustainability* Subhash Babu, Sanjay Singh Rathore, Vinod Kumar Singh, Raghavendra Singh, 2023-10-24 Researchers and policy planners are in search of a solution to address the twin challenges of maximizing agricultural production while maintaining improving ecosystem sustainability Enhancing farm productivity is needed in certain regions of the world to satisfy local food consumption and farmers needs Linear economy based input intensive conventional agriculture CAPS has increased production output but has not made agriculture more sustainable Henceforth a farming system that aims to reduce the adverse impact on the environment as well as enhance agricultural productivity by reducing environmental footprint and improving soil health and economic wellbeing is needed in the present day Integrated organic farming systems IOFS involve residue recycling bio intensive cropping high tech horticulture mushroom dairy poultry fishery apiary etc can improve the ecosystem health and augment the income and livelihood security of the growers Worldwide IOFS are gaining popularity due to improved ecosystem services and improving farm productivity and livelihood security Hence IOFS a circular economy based reuse recycle repair agricultural production system can be alternatives to energy intensive inputs based on CAPS Hence there is an urgent need to select suitable IOFS models with proper resource optimization for productivity maximization and better ecosystem sustainability Undoubtedly IOFS reduces energy use from synthetic agrochemicals but food production in IOFS is highly dependent on fossil fuel energy that must be addressed urgently Despite the enormous positive outlooks there are several challenges in the adoption of IOFS models The IOFS is a multiproduct oriented production system that needs multi specialties and marketing Capacity building and infrastructure development are also great challenges in adopting IOFS Moreover the development of IOFS models is highly individualistic and location specific production systems need proper resource optimization and characterization Hence the development of site specific IOFS

models to maintain food quality with productivity improvement is a genuine issue to the researchers which needs to be addressed Papers original research review letter to the editors spanning across the discipline related to the IOFS development in sustainable ways are encouraged for inclusion in this research topic Papers should explicitly cover ecosystem restoration farm productivity and profitability and could have a specific focus on the following areas the IOFS models for enhancing productivity and environmental quality through an integrated management approach aiming at the maximization of use efficiencies the management of biomass waste to restore the soil fertility and ecosystem services the effect of integrated management practices on greenhouse gas emissions and energy use Critical approaches for climate smart food production systems
