Human Development A Life Span View 6th Ed:

Human Development Robert V. Kail, John C. Cavanaugh, 2013 Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT A LIFE SPAN VIEW 6E International Edition. With its comprehensive, succinct and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence combined with John C. Cavanaugh's extensive research in gerontology result in a book with a rich description of all life span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course.

By combining the best of topical and chronological approaches this text presents life span development as a motion picture rather than as a series of individual snapshots

Understanding Human Development Grace J. Craig, Wendy L. Dunn, 2006

This chronologically organized text has an applied focus and is intentionally selective in the topics it includes so that the full text can be managed within one semester It assumes no prior psychology exposure making it perfect for students of nursing social work and education in addition to psychology but it does

not attempt to address in depth those issues covered extensively in Introductory Psychology courses Rather the text reflects the field of Human Development in its current state with emphasis on developmental processes and their explanations The research base of the text is current and solid and the book emphasizes depth of content over research process
