

How to change your network password via Epic Hyperspace

This document explores how to change your network password directly in Epic.

Important note: If you have a computer assigned to you (one that you log into directly), we strongly recommend changing your password using features on the Epic itself while onsite at a Legacy facility. See instructions in the documents titled, "How to change your password from a Windows XP (or Windows 7) workstation."

All Epic users have access to change their network password through Hyperspace. This is most useful for clinical staff who frequently use shared or auto-login machines to access Legacy systems.

1. Once you've logged into Epic, click the down arrow on the right-hand side of the Log Out button in the top, right-hand corner of the screen.

2. After clicking the down arrow, the two options should display **Change Password**.

3. The **Change User Password** box will appear. In the **Old password** field, enter your current network password. In the **New Password** and **Verify new password** fields, enter the new strong password you would like to use. Press **Accept** when finished.

4. If the credentials you've supplied are correct, the **Password Change Confirmation** screen will be displayed, and you will have successfully changed your network password.
