**Paranormal Beliefs** Erich Goode,2000 Despite the continued and

growing popularity of such phenomena as angels witches extra sensory perception psychics astrology foretelling the future living past lives ghosts and communicating with the dead such beliefs have received little scrutiny from sociologists Who believes in them Why And with what consequences A paranormal belief system is generated as a result of cultural social and social psychological forces it is linked with social institutions in identifiable ways and has identifiable consequences

According to the author the explication of how paranormal beliefs are accepted or rejected yields richer understanding of social structures and dynamics Accepting one or more of the beliefs or accepting a cosmology that rules them out of the realm of the possible tells us a great deal about the believers and disbelievers as well as the society in which they live This compelling well documented work presents a much needed sociological examination of the role paranormal beliefs play in our society
