**Shared Decision Making in Health Care** Glyn Elwyn, Adrian Edwards, Rachel Thompson, 2016-07-22 Over the past decade health care systems around the world have placed increasing importance on the relationship between patient choice and clinical decision making. In the years since the publication of the second edition of *Shared Decision Making in Health Care* there have been significant new developments in the field, most notably in the US where Obamacare puts shared decision making (SDM) at the centre of the 2009 Affordable Care Act. This new edition explores shared decision making by examining from practical and theoretical perspectives what should comprise an effective decision making process. It also looks at the benefits and potential difficulties that arise when patients and clinicians share health care decisions. Written by leading experts from around the world and utilizing high quality evidence, the book provides an up to date reference with real world context to the topics discussed and in depth coverage of the practicalities of implementing and teaching SDM. The breadth of information in *Shared Decision Making in Health Care* makes it an essential resource for policy makers and health care workers. As health care systems adapt to increasingly collaborative patient clinician care frameworks, this will also prove a useful guide to SDM for clinicians of all disciplines.

**Decision Aid Videotape on Young Women's Attitudes and Knowledge about Hormone Replacement Therapy** David

Neal Kerner, 1998 The application of medical treatments requires informed consent. However, lack of knowledge and information processing limitations may limit the ability to make informed decisions. Decision aids address these issues and may increase patients' ability to make informed choices. However, little research has examined decision aid effectiveness. One difficult decision faced by many women is whether to use hormone replacement therapy (HRT) which is associated with both potential risks and potential benefits. A tool designed to enhance HRT decision making could benefit many women. This paper presents the evaluation of an HRT videotape decision aid. The paper's primary goals are to 1. examine the impact of the decision aid on treatment relevant knowledge, perceived knowledge and perceived ability to make an informed choice about HRT; 2. determine the impact of the decision aid on HRT attitude; 3. examine whether the decision aid is perceived as useful; and 4. evaluate the influence of specific decision aid components on these issues. There were three phases to this project. First, several focus groups were convened to gain better understanding of women's knowledge and attitudes about HRT. Next, two pilot studies examined how altering the presentation of HRT type information affects preference for hypothetical treatments. The third phase involved the evaluation of an HRT decision aid videotape. Female college students ( $n = 153$ ) were randomly assigned to one of four conditions: 1. complete HRT video; 2. HRT video with patient testimonials excluded; 3. HRT video with decision aid data excluded; or 4. a control non-HRT video. All subjects completed pre and post video questionnaires examining HRT knowledge and attitudes. The HRT video was associated with increases in knowledge, perceived knowledge and perceived ability to make an informed HRT decision. Actual knowledge and perceived knowledge were not related and perceived ability was predicted by perceived knowledge rather than actual knowledge. The video was perceived as a useful tool for HRT decision making although it did not increase positive attitude towards HRT. Results were similar for each version of the video except that the version without patient testimonials was perceived more negatively. Implications of these findings are discussed.

**National Forum of Educational Administration and Supervision Journal**, 1994 Group Work in the Helping Professions David G. Zimpfer, 1984 Proceedings of the ... Conference New Zealand Geographical Society.

Conference, 1997 **Educational and Psychological Research**, 1982 School Leadership and Administration Petra E. Snowden, Richard A. Gorton, 1998 The text is designed to help prospective and experienced principals, administrators and supervisors increase their knowledge and skills through concepts, case studies and simulations. Two parts makeup this text. Part I presents important theoretical concepts and research findings that, if adequately understood and appropriately applied, can improve educators' problem solving and leadership effectiveness. Problems and issues illustrated in case studies and simulations are presented in Part II. Nevertheless, it is the problem dimension of human behaviour in school administration that should be studied and it is here that preparation and in-service training programs need to be directed if prospective and experienced administrators and supervisors are to be equipped with the skills needed for the future as well as for the present.

*Changing Urban Education* Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our

schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future      **The Rural Educator** ,2007
