on Prevention of Diabetes and Complications 2017 Conference Series, October 12 13 2017 London UK Key Topics Diabetes Types and Symptoms Pathophysiology of diabetes Genesis of Diabetes Transplantations in Diabetes Diabetes and its Complications Computerised applications in Diabetes Technologies for the Treatment Of Diabetes Screening of Diabetes

Diabetes Metabolism and Obesity Paediatric diabetes Diabetes and Associated Disorders Gestational Diabetes Emerging Focus on Diabetes Research Diabetes Education and its Risk Factors Science and Technology Resources James E. Bobick, G. Lynn Berard, 2011-04-19 An indispensable resource for anyone wanting to create, maintain, improve, understand or use the diverse information resources within a sci tech library. Providing cutting edge practices and tools in library and information science as well as a historical perspective on science and technology resources. **Science and Technology Resources A Guide for Information Professionals and Researchers** begins with an overview of the nature of sci tech literature, the information seeking behavior of scientists and engineers and an examination of the research cycle. Each of the 12 chapters focuses on a specific format showcasing specific examples and representative resources in current practice. This practical guide will be invaluable to librarians, information specialists, engineering and science professionals and students interested in acquiring a practical knowledge of science and technology resources. The comprehensive subject bibliographies provide a sci tech library administrator with the resources to develop and maintain an effective science technology and engineering collection.

On Twenty-Five Years of Social Epistemology James Collier, 2016-03-16 This edited collection charts the development of and prospects for conceiving knowledge as a social phenomenon. The origin, aims and growth of the journal *Social Epistemology* founded in 1987 serves to anchor each of the book's contributions. Each contribution offers a unique but related insight on current issues affecting the organization and production of knowledge. In addition, each contribution proposes necessary questions, practices and frameworks relevant to the rapidly changing landscape of our conceptions of knowledge. The book examines the commercialization of science, the neoliberal university, the status and conduct of philosophy, the cultures of computer software and social networking, the practical political and anthropological applications of social epistemology and how we come to define what human beings are and what activities human beings can and should sustain. A diverse group of noted international scholars lends necessary original and challenging perspectives on our collective approach to knowledge. This book was originally published as a special issue of *Social Epistemology*.
