

## Editorial

It is both a great pleasure as well as an honor to take over editorship of the *Journal of Environmental Psychology*, the premier and flagship journal in the field covering all aspects of human-environment interactions. I am grateful to the outgoing editors, Florian Kaiser and Jeff Joireman, for introducing a variety of welcome changes and continuing to increase the impact of the journal. The current editorial transition offers an opportunity to reflect on the status of our field, the journal, and important changes and discussions that are taking place in psychological science and beyond about how to best conduct our scholarship. I would therefore like to take this opportunity to share my vision for the journal moving forward as well as outline some of the changes I will be instituting in the service of reproducibility, open science, and furthering the development of environmental psychology.

### 1. The future of environmental psychology

As editor emeritus, Bob Gifford elegantly wrote, “environmental psychology matters” (Gifford, 2014). The discipline emphasizes the interplay between individuals and their surroundings. As such, I intend to keep the focus of the journal broad to reflect the whole breadth of human-environment interactions, from spatial cognition and wayfinding, to the restorative effects of nature on human cognition, development, and well-being, to the design and experience of public spaces and places, theories of proenvironmental behavior, resource dilemmas, and the psychology of sustainability and climate change.

Yet, there is a change of focus that I wish to highlight here. Traditionally, our definitions have often described interactions between people and their “built and natural” environments. I think the time has come to broaden this definition. Environmental psychology is not just about built and natural environments. The discipline also describes the social processes through which people interact in built and natural settings. Moreover, with the advent of rapid technological change and social media, virtual environments are becoming increasingly relevant to the way that people interact with others and their surroundings in both every day and professional life. Accordingly, I have changed the focus of the journal—and I hope to encourage the field—to start thinking more about the way that people interact in natural, built, social, virtual, and online environments.

There are two aspects that I particularly admire about our field: 1) its interdisciplinary focus, including engineers, geographers, economists, architects, social, developmental, and cognitive psychologists (to name a few); and 2) its unique focus on place and space. Social interaction does not occur in a vacuum, we are always somewhere, which is what environmental psychology is all about. Yet, at the same time, I find that our field has become somewhat fractured, with some confusion as to whether conservation psychology, geographical psychology, ecopsychology, and climate change psychology are all different fields or

simply areas of “environmental psychology”. Our field is booming, with nearly 600 new submissions a year, I think it is crucial that authors therefore pay close attention to advancing the scientific development of environmental psychology as a unique field of study.

Lastly, there are areas our field has not taken as much advantage of, such as the rise of “Big Data” for testing theories in behavioral science (Rugggeri, Yoon, Küche, van der Linde, & Mommig, 2017) or the use of computational and neuroscientific methods in environmental perception, cognition, and decision-making. Although I do not want to be prescriptive in outlining what kind of research the journal will or will not publish, there are some critical questions that we need to ask ourselves. For example, one of the great strengths of our field is a real interest in behavior and outcome variables, so how useful are more intention-only, willingness to pay, or hypothetical decision-making studies? I don’t need to remind our readers of the intention-behavior gap (Sheeran & Webb, 2016) or issues with overreliance on a particular paradigm (Kaiser, Schulz, & Schenckle, 2007), but we have continued to publish such studies despite their limitations. Accordingly, I want to continue to encourage potential authors to use more behavioral measures and to conduct more research on the validity of our outcome measures (e.g. see Kaiser & Gifford, 2014). This is not to say that measures for behavior aren’t useful, there are many situations in which hypothetical studies might still add new insights (e.g. in a new domain), but perhaps there are other exciting questions we can turn our attention to, from exploring reverse or simultaneous causality between attitudes and behavior and cross-cultural testing of our theories, to the role of artificial intelligence and social media as an increasingly important aspect of the “online” environment. Some members of the board have called for less research on beliefs and more research on action (Song, 2018). The editorial team has also become more critical in assessing the need for publishing new scales. Do we need more ecological or environmental attitude and behavior scales? Perhaps, if they are meaningfully extending our understanding of environmental psychology, but we need to move beyond factor analyses. The relevance of a scale in predicting environmental behavior should be demonstrated as well as the extent to which a new scale is unique from existing ones. These rules are not hard and fast, but simply an invitation for authors to start thinking about what we have done well and where we see the future of environmental psychology.

### 2. Submission formats and new author guidelines

The outgoing editors have extended the range of submission formats, which I fully support. The journal now has the following submission formats: original, single-study articles, multiple-studies articles, involving experimental, meta-analytical, or cross-cultural research, brief empirical reports, and letters to the editor. The Behavioral sciences

### **Journal Of Environmental Psychology Introduction**

In todays digital age, the availability of Journal Of Environmental Psychology books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Journal Of Environmental Psychology books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Journal Of Environmental Psychology books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Journal Of Environmental Psychology versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Journal Of Environmental Psychology books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether youre a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Journal Of Environmental Psychology books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Journal Of Environmental Psychology books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works

and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Journal Of Environmental Psychology books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Journal Of Environmental Psychology books and manuals for download and embark on your journey of knowledge?
