

MOTOR CONTROL SYSTEM

What is motor control??

- Motor control is about the way how we **design** and **construct** the circuit to control an induction motor in terms of beginning/start the operation and stop the operation.
- There are two types of circuits that we have to design and construct: **power circuit** and **control circuit**.

What is Induction Motor?

- An induction motor or asynchronous motor is a type of alternating current motor where power is supplied to the motor by means of electromagnetic induction.
