*Making Sense of Sports* Ellis Cashmore, 2010-09-13 Ellis Cashmore's unique multidisciplinary introduction to the study of sport in its cultural context reaches its fifth edition which comes enhanced with new chapters, new features and access to a new online resource center. New material includes discussions of Islam, exercise culture, sports management and the morality of sport. The addition of self-assessment tests, PowerPoint presentations, glossary and original podcasts of the author in conversation with leading scholars of sport supplement the book's value as a teaching instrument. **Ethics, Knowledge and Truth in Sports Research** Graham McFee, 2009-12-16 In this groundbreaking study Graham McFee argues that sound high level research into sport requires a sound rationale for one's methodological choices and that such a rationale requires an understanding of the connection between the practicalities of researching sport and the philosophical assumptions which underpin them. Drawing on a wide range of examples from the laboratory to the sports field, McFee explores the concepts of knowledge and truth in sports research and makes a powerful case for a philosophical deepening of our approach to method and methodology in sport. This book is important reading for all advanced students and researchers working in sport, exercise and related disciplines.

**Principles and Practice in EU Sports Law** Stephen Weatherill, 2017-08-11 *Principles and Practice in EU Sports Law* provides an overview of EU sports law. In particular, it assesses sporting bodies' claims for legal autonomy from the ordinary law of states and international organizations. Sporting bodies insist on using their expertise to create a set of globally applicable rules which should not be deviated from irrespective of the territory on which they are applied. The application of the *lex sportiva* which refers to the conventions that define a sport's operation is analysed as well as how this is used in claims for sporting autonomy. The *lex sportiva* may generate conflicts with a state or international institution such as the European Union and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain. Stephen Weatherill's text underlines the tense relationship between *lex sportiva* and national and regional jurisdictions which is exemplified with specific focus on the EU. The development of EU sports law and its controversies are detailed, reinforced by the example of relevant legal principles in the context of the practice of sports law. The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy and the variation between different jurisdictions and sports is evident. Furthermore, the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special and in turn how far its special character should be granted legal recognition.
