

The TV Stars from the desert

The meerkats of the Kalahari desert in South Africa are famous and Ann and Steve Toon went to find them.

Meerkats are animals which are about 30cm tall and live in groups of 20 to 30. The ones we were looking for were filmed during a period of four years and starred in a TV documentary series. We wanted to see them for real.

So it's 5.30am and we are in the middle of nowhere, waiting for the sun to burn off the remains of yesterday's storm clouds. Nearby, a large black bird lets rip his deafening, regular wake-up call. **9** And while our eyes are off the ball, a meerkat makes his appearance.

He pops his head out of the burrow where he has spent the night. **10** Apparently satisfied, he stands upright. He is followed by a female and then some other adults.

We arrived in extreme heat yesterday afternoon with great expectations, but this soon turned to disappointment. **11** Today, however, we are finally metres away from some of the world's most charismatic wild creatures. Here are the homes of 14 meerkat groups who are the real-life, wildlife stars of an award-winning TV series.

To our excitement, the adult meerkats are swiftly followed out of the burrow by four five-week-old pups. It's the summer breeding season so you would expect to see young. **12**

Meerkats are animals which are about 30cm tall and live in groups of 20 to 30. The ones we were looking for were filmed during

Unbelievably comical and cute, the youngsters are each a perfect smaller version of their parents.

- A** We realise he has seen us and is checking us out before emerging fully.
- B** This is because they are most active early in the morning and in the late afternoon.
- C** This makes us both jump and distracts our attention from why we are here.
- D** We had timed our visit with this possibility in mind but we still couldn't believe our luck.
- E** This was because a series of seemingly endless, ear-splitting Kalahari thunderstorms resulted in a no-show of our subjects.
