

The 5 Rs of Medication Safety Guidance

The 5 Rs of medication safety are a simple, consistent safety check that all healthcare and children's staff should follow every time medication is administered. Highlighting the points that the medication safety and helping them help easily remember and put into practice.

1 Right Child

Check the child's name and date of birth against the label and form.

2 Right Medication

Check the name and packaging match the written instructions.

3 Right Dose

Check the amount is exactly as prescribed in orders.

4 Right Time

Check it at the correct time, on the right date.

5 Right Method

Make sure to give the right way.

How to Use the Puffer Effectively

1. Place the pacer in your mouth and seal your lips to prevent medication from escaping around it.
2. Inhale slowly and steadily to fill your lungs.
3. Hold your breath for 10 seconds or until you feel the medication in your lungs. The pacer will be a constant reminder to breathe slowly and deeply.
4. Breathe for 10 seconds after each use to prevent medication from escaping.

By following these 5 Rs, healthcare staff can ensure that every child and young person receives the right medication, at the right time, in the right way, and in the right amount. This simple, consistent safety check can help ensure the safety of every child and young person, making a real difference to keeping children safe, healthy and well.
