Budgetary control

Budgetary control is the process by which budgets are prepared for the future period and are compared with the actual performance for finding out variances, if any. The comparison of budgeted figures with actual figures will help the management to find out variances and take corrective actions without any delay.

The comparison of budgeted and actual figures will enable the management to find out discrepancies and take remedial measures at a proper time. The budgetary control is a continuous process which helps in planning and co-ordination. It provides a method of control too. A budget is a means and budgetary control is the end-result.

Objectives of Budgetary Control

The main objectives of budgetary control are given below:

- 1) Defining the objectives of the enterprise.
- 2) Providing plans for achieving the objectives so defined.
