Engineering Solutions for Intensification of Production Da Yun Xu, 2014-02-27 Selected peer reviewed papers from the 2014 2nd International Conference on Manufacturing Engineering and Technology for Manufacturing Growth METMG 2014 January 20 21 2014 Miami State of Florida USA *Fundamental Solutions and Local Solvability for Nonsmooth Hormander's Operators* Marco Bramanti, Luca Brandolini, Maria Manfredini, Marco Pedroni, 2017-09-25 The authors consider operators of the form in a bounded domain of where are nonsmooth Hormander's vector fields of step such that the highest order commutators are only Hormander continuous Applying Levi's parametrix method the authors construct a local fundamental solution for and provide growth estimates for and its first derivatives with respect to the vector fields Requiring the existence of one more derivative of the coefficients the authors prove that also possesses second derivatives and they deduce the local solvability of constructing by means of a solution to with Hormander continuous The authors also prove estimates on this solution

Models and Theories in Social Systems Cristina Flaut, Šárka Hošková-Mayerová, Daniel Flaut, 2018-10-12 This book concisely presents a broad range of models and theories on social systems Because of the huge spectrum of topics involving social systems various issues related to Mathematics Statistics Teaching Social Science and Economics are discussed In an effort to introduce the subject to a wider audience this volume part of the series Studies in Systems Decision and Control equally addresses the needs of mathematicians statisticians sociologists and philosophers The studies examined here are divided into four parts The first part Perusing the Minds Behind Scientific Discoveries traces the winding path of Syamal K Sen and Ravi P Agarwal's scholarship throughout history and most importantly the thought processes that allowed each of them to master their subject The second part covers Theories in Social Systems and the third discusses Models in Social Systems while the fourth and final part is dedicated to Mathematical Methods in the Social Sciences Given its breadth of coverage the book will offer inquisitive readers a valuable point of departure for exploring these rich vast and ever expanding fields of knowledge *The ^AOxford Handbook of Cognitive Science* Susan E. F. Chipman, 2016-11-10 The Oxford

Handbook of Cognitive Science emphasizes the research and theory most central to modern cognitive science computational theories of complex human cognition Additional facets of cognitive science are discussed in the handbook's introductory chapter

Brain and Mathematical Cognition Xinlin Zhou, 2024-08-01 This book intends to present a series of insights coming from in depth investigation of brain and mathematical cognition in Chinese population Specifically the book introduces research on the associations among number sense visual form perception and mathematical fluency symbolic and non symbolic mental number line and the role of spatial modeling and logical inference in mathematical problem solving The book summarizes author's previous studies on the involvement of semantic network other than visuospatial network in mathematical cognition The three component mathematical model that comes out of more than 10 years of research on mathematical cognition is introduced The book presents the effect of learning experience on arithmetic related brain system

Chinese abacus that can be used to eradicate developmental dyscalculia in classroom is briefly discussed Special attention in this book is paid to mathematical anxiety and mathematical learning disorders in Chinese schoolchildren Finally gender differences in mathematical cognition are also reviewed **Colorado Online Learning** ,2011 *Analysis of Monge-Ampère Equations* Nam Q. Le,2024-03-08 This book presents a systematic analysis of the Monge Amp re equation the linearized Monge Amp re equation and their applications with emphasis on both interior and boundary theories Starting from scratch it gives an extensive survey of fundamental results essential techniques and intriguing phenomena in the solvability geometry and regularity of Monge Amp re equations It describes in depth diverse applications arising in geometry fluid mechanics meteorology economics and the calculus of variations The modern treatment of boundary behaviors of solutions to Monge Amp re equations a very important topic of the theory is thoroughly discussed The book synthesizes many important recent advances including Savin s boundary localization theorem spectral theory and interior and boundary regularity in Sobolev and H lder spaces with optimal assumptions It highlights geometric aspects of the theory and connections with adjacent research areas This self contained book provides the necessary background and techniques in convex geometry real analysis and partial differential equations presents detailed proofs of all theorems explains subtle constructions and includes well over a hundred exercises It can serve as an accessible text for graduate students as well as researchers interested in this subject Topological Methods in Hydrodynamics Vladimir I. Arnold,Boris A. Khesin,2021-05-12 The first monograph to treat topological group theoretic and geometric problems of ideal hydrodynamics and magnetohydrodynamics from a unified point of view It describes the necessary preliminary notions both in hydrodynamics and pure mathematics with numerous examples and figures The book is accessible to graduates as well as pure and applied mathematicians working in hydrodynamics Lie groups dynamical systems and differential geometry Nonlinear Elliptic Equations and Nonassociative Algebras Nikolai Nadirashvili, Vladimir Tkachev, Serge Vlăduț,2014-12-03 This book presents applications of noncommutative and nonassociative algebras to constructing unusual nonclassical and singular solutions to fully nonlinear elliptic partial differential equations of second order The methods described in the book are used to solve a longstanding problem of the existence of truly weak nonsmooth viscosity solutions Moreover the authors provide an almost complete description of homogeneous solutions to fully nonlinear elliptic equations It is shown that even in the very restricted setting of Hessian equations depending only on the eigenvalues of the Hessian these equations admit homogeneous solutions of all orders compatible with known regularity for viscosity solutions provided the space dimension is five or larger To the contrary in dimension four or less the situation is completely different and our results suggest strongly that there are no nonclassical homogeneous solutions at all in dimensions three and four Thus this book gives a complete list of dimensions where nonclassical homogeneous solutions to fully nonlinear uniformly elliptic equations do exist this should be compared with the situation of say ten years ago when the very existence of nonclassical viscosity solutions was not known *Mathematical*
