

**Science Curriculum: High School Physical Science
Georgia Performance Standards: Year Curriculum Map**

This is an adjusted document to be used by the teachers in the Bibb County Public School System to meet the state expectations for Physical Science. This map takes into consideration assessment dates and non-student days of attendance as established by the Bibb County DOE. This map is designed to support the major concepts addressed in the High School Physical Science Curriculum of the Georgia Performance Standards through the processes of inquiry. These units are written to be standalone units that should be taught in the following sequence, but this DOES NOT mean that they should not be integrated one with another. Matter is the main idea embedded throughout the course. Energy should be discussed in each unit as well. The length of each unit is a suggestion which may allow for 2-3 (+/-) days of flexibility. Unit days of instruction, student practice/labs and assessments should be included.
