Math and Stories, Grades K-3 Marian R. Bartch, 1996 Discover the math lessons students can learn from activities based on 56 carefully selected children's books. Each book offers 28 fully described activity units supported by three or four reproducible handouts. Units specify correlations to standards set by the National Council of Teachers of Mathematics. In activities based on reading *Jumanji* for example students distinguish between probable and improbable events, do mapping on a coordinate grid and write about what would happen if their own favorite game suddenly became real. *Grades K-6 Answer Keys* Illustrated Good Year Books.

The Common Core in Action Deborah J. Jesseman, 2015-06-19 This book addresses Common Core State Standard curriculum resources to assist the school librarian in collaborating with classroom teachers. Librarians are being asked to understand the Common Core State Standards (CCSS) and their implications to programming and instruction as well as to collection development planning. Using lesson plans originally published in *School Library Monthly* this title builds upon them adding many additional plans that address CCSS issues. The plans will help you implement the standards and can also be used as stepping stones to facilitate planning conversations and collaboration with teachers to co-teach lessons correlated with the standards. The book begins with an overview of the CCSS what they are, how are they different from the content standards and what the implications are for schools where the state has adopted them, including what the CCSS mean for collection development. It then goes on to explore the opportunities the CCSS present for the school librarian looking at how you can become a leader in employing the process. The majority of the book is devoted to reproducible lesson plans organized by curricular area or topic and grade level for ease of use.
