Astin s I E O model as a framework this problem of practice study examined nursing student inputs for success in medication calculation competency and used an elective medication calculation course taught with a student ready critical care pedagogy as an environmental modification to determine changes in student outcomes of medication calculation competency awareness of academic resources and use of academic help seeking behaviors A historical data set was examined for

potential indicators of failing the first attempt of the required medication calculation exam with several significant findings Subsequent logistic regression analysis revealed that high school GPA first semester college GPA and ATI Critical Thinking exam scores were significantly associated with likelihood to pass the first attempt The resulting formula from this model had low accuracy for predicting which students would fail the first attempt but high accuracy for identifying students likely to pass the first attempt This model can help guide conversations with students to encourage enrollment in the elective medication calculation course for students who are more likely to need additional support to meet this competency After taking the elective course the first time pass rate on the medication calculation exam was 100% for the enrolled students which was a significant improvement when compared to the historical data set Additionally a post course survey provided information about students awareness of resources within the nursing program and indicated that students perceived they were more willing to engage in academic help seeking behaviors after taking the course These results reveal that the elective course is beneficial for students in gaining medication calculation competency and that using a student ready critical care pedagogy can also provide other benefits to support prelicensure nursing student success Medication Safety and Cost Recovery Chip Caldwell,2001 The core of this book is the 100 Day Plan a step by step model for reducing errors and recapturing costs Use the plan strategies to galvanize your staff to reduce errors establish processes for attacking errors evaluate how well interventions are working and recover lost productivity The book also explores the many factors that accelerate the reduction of medication errors and those that can slow improvement work Get your organization started by using the Organizational Assessment and Planning Guide contained in the last chapter These tools are also available online in a workbook format that can be printed and copied for use in your organization
