contextual and action driven Foqu offers an integrated and comprehensive perspective to understand design activity both from an epistemological and practical standpoint This results in an expanded discourse about the true nature of architectural design processes Within this theoretical framework part two explains how case study research is a primordial means to establish a knowledge base for the discipline and profession of architecture From this premise Foqu compares case study research in law medicine and business administration and develops a practical and comprehensive approach to case studies in architecture The methodology offers a solid and general framework wherein a consistent body of knowledge regarding architectural design processes can be generated This promotes deeper insight in the complex relationship between context product and process which governs every design process on the one hand and between the several stakeholders involved on the other hand Publisher     **Encyclopedia Britannica** Hugh Chisholm,1910     His excellency.
