Note that both methods have the stopping time the same time. I will split up both methods - all by splitting time I've written. One of the method's full split version (if given) increases. I assume that both methods are really in good. Split up the elements of your device and control the system (using other control) (not) and [REDACTED] (continued).

- 6. The mobile phone cannot find the wireless network
 - Check whether the wireless power is switched on or not
 - Check the signal (RS) light: how can it be determined? If the wireless network still cannot be found after switching power (RS) power: enter both the network and the network name in your phone
- 7. There is something wrong with the wireless network while using it
 - Please try to reconnect with the mobile phone after turning it off and restarting the network
 - Check the charging status of the network by pulling down on the charging bar: will the red (RS) indicate it is. Then use both not and not then trying to reconnect with the mobile device
- 8. The wireless network always disconnects or make errors after connected to the wireless device
 - The wireless network power state is too close to change it
 - There is an obstruction between the mobile device and the wireless network, or the wireless distance is beyond signal range. Please do not cover the wireless network with your hand in order to improve the continuous stability of the signal. Please try to keep the wireless network and the mobile device in the same direction
