Myworld History And Geography 2011:

Reading Actively in Middle Grade Social Studies Don K. Philpot, 2019-08-14 Middle grade students can learn a great deal about themselves and their world by reading informative texts in social studies courses. These texts will focus on important topics in history, geography, civics, government, and economics, and offer students a range of perspectives on past and present social events. But reading is a complex act, and most students need specific reading related support to understand assigned texts in middle grade social studies courses. This book focuses on the cyclical nature of reading the actions proficient readers engage in to understand social studies textbooks and other informational texts, and the instructional support that teachers can provide to enhance middle grade students' learning of social studies content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail, and how do they relate to each other? What teacher mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?

Inquiry-Based Teaching and Learning across Disciplines Gillian Kidman, Niranjan Casinader, 2017-08-10 This research based book dissects and explores the meaning and nature of Inquiry in teaching and learning in schools challenging existing concepts and practices. In particular it explores and contests prevailing attitudes about the practice of inquiry based learning across the Science, Geography and History disciplines as well as focusing on the importance of the role of teacher in what is frequently criticised as being a student controlled activity. Three frameworks which are argued to be necessarily intertwined for discipline specific literacy guide this inquiry work: the classroom goals, the instructional approach and the degree of teacher direction. The foundation of the analysis is the notion of educational inquiry as it is structured in the Australian Curriculum along with the locating of the study in international trends in inquiry learning over time. It will be of great interest to researchers, higher degree students and practicing professionals working in Education and Sociology.

The Long History of Partition in Bengal Rituparna Roy, Jayanta Sengupta, Sekhar Bandyopadhyay, 2024-02-13 This book focuses on the aftermath of the 1947 Partition of India. It considers the long aftermath and afterlives of Partition afresh from a wide and inclusive range of perspectives and studies the specificities of the history of violence and migration and their memories in the Bengal region. The chapters in the volume range from the administrative consequences of partition to public policies on refugee settlement, life stories of refugees in camps and colonies, and literary and celluloid representations of Partition. It also probes questions of memory, identity, and the memorialization of events. Eclectic in its theoretical orientation and methodology, this book will be of interest to scholars and researchers of partition history, colonialism, refugee studies, Indian history, South Asian history, migration studies, and modern history in general.
