Congress. House. Committee on Science. Subcommittee on Space and Aeronautics, 2003 Lectures on Functor Homology Vincent Franjou, Antoine Touzé, 2015-12-08 This book features a series of lectures that explores three different fields in which functor homology short for homological algebra in functor categories has recently played a significant role For each of these applications the functor viewpoint provides both essential insights and new methods for tackling difficult mathematical problems In the lectures by Aurélien Džament polynomial functors appear as coefficients in the homology of infinite families of classical groups e.g. general linear groups or symplectic groups and their stabilization Džament's theorem states that this stable homology can be computed using only the homology with trivial coefficients and the manageable functor homology The series includes an intriguing development of Scorichenko's unpublished results The lectures by Wilberd van der Kallen lead to the solution of the general cohomological finite generation problem extending Hilbert's fourteenth problem and its solution to the context of cohomology The focus here is on the cohomology of algebraic groups or rational cohomology and the coefficients are Friedlander and Suslin's strict polynomial functors a conceptual form of modules over the Schur algebra Roman Mikhailov's lectures highlight topological invariants homotopy and homology of topological spaces through derived functors of polynomial functors In this regard the functor framework makes better use of naturality allowing it to reach calculations that remain beyond the grasp of classical algebraic topology Lastly Antoine Touzé's introductory course on homological algebra makes the book accessible to graduate students new to the field The links between functor homology and the three fields mentioned above offer compelling arguments for pushing the development of the functor viewpoint The lectures in this book will provide readers with a feel for functors and a valuable new perspective to apply to their favourite problems **Educational Times**, 1908 **English Mechanics and the World of Science**, 1884 **The Gentleman's journal**, 1870 **Academy, with which are Incorporated Literature and the English Review**, 1895 English Mechanic and Mirror of Science, 1880 **Academy and Literature** Charles Edward Cutts Birch Appleton, Charles Edward Doble, James Sutherland Cotton, Charles Lewis Hind, William Teignmouth Shore, Alfred Bruce Douglas, Ellis Ashmead-Bartlett, Thomas William Hodgson Crosland, 1895 *Education Outlook*, 1908 **Academy; a Weekly Review of Literature, Learning, Science and Art**, 1895 The Poetical gazette the official organ of the Poetry society and a review of poetical affairs nos 4-7 issued as supplements to the Academy v 79 Oct 15 Nov 5 Dec 3 and 31 1910
