

## Features and highlights

- Powerful energy management.** Optimum start ensures efficient equipment start times. Demand limiting offers sophisticated load optimization, and energy logging enables you to monitor progress and savings.
- Tenant activity.** Automatically detect and log after-hours tenant override activity, then generate multiple tenant bills.
- Custom graphics.** Three-dimensional, full-color, animated data displays can be customized to suit any requirement and easily updated for equipment additions, moves, and changes.
- Networking and connectivity.** Built-in Internet and wide area network (WAN) capabilities with BACnet/IP. Remote site and roaming access with modem and direct serial connections.
- SQL Server support.** Migration to an Enterprise server improves system performance and offers a more robust, stable database, giving you better access to data; third-party custom reporting simplifies connectivity to an Alerton system.
- Improved job design features.** New features enable users to add displays faster, bill multiple tenants at the same time, and restore all or only some files during deployment.

Alerton® Envision for BACtalk is powerful operator workstation software for BACnet systems. Use it to manage and control building equipment with unprecedented flexibility and power. Envision for BACtalk communicates with BACnet-compliant devices over an Ethernet LAN or through point-to-point (PTP) serial or modem connections.

Three-dimensional animation and full-color graphics enable access to real-time data and energy management features with simple point-and-click control. As-built drawings, floor plans and specific graphics of HVAC equipment are customized for each site. Import images from CAD programs or virtually any graphics program.

In a multi-building campus, a BACnet Ethernet LAN or IP network can interconnect buildings. For large corporations with dispersed holdings, Envision for BACtalk supports BACnet/IP for building integration across the Internet and wide area networks (WANs). Envision for BACtalk can also connect to remote sites via modem or be installed on a laptop computer for direct system access.

SQL Server support enables users to migrate jobs from a conventional server database to an Enterprise server database, improving system performance and providing better access to data. The Job Merge function saves time on bigger job sites by making it easier to add and move graphics. Flexible Users and Groups functionality enables device-level privileges and streamlines setup.

These flexible, integrated control options—and many more featured in Envision for BACtalk—save countless hours and resources. Engineers and technicians can control any building from a single, central operator terminal, and have any number of options for roaming system access.
