Manual Do Clio 2003:

The Oxford Guide to International Humanitarian Law Ben Saul, Dapo Akande, 2020-05-07 International humanitarian law is the law that governs the conduct of participants during armed conflict. This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not or who no longer take part in the hostilities. It is one of the oldest branches of international law and one of enduring relevance today. The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law. Written by a stellar line up of contributors drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject, the text offers a comprehensive and authoritative exposition of the field. The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence. Each chapter illuminates how the law applies in practice but does not shy away from the important conceptual issues that underpin how the law has developed. It will serve as a first port of call and a regular reference work for those interested in international humanitarian law.

The Embodied Eye David Morgan, 2012-02-01 Exploring a dazzling variety of religious imagery, David Morgan shows how vision functions as an active physical process embedded in bodily experience and profoundly shaped by social practice. Morgan's bold, thoughtful interpretations will fascinate art historians and students of visual culture as well as historians of religion. Pepe Karmel, Department of Art History, New York University. *The Embodied Eye* is an important and truly groundbreaking book. It represents a substantive and quite fascinating extension of David Morgan's previous work, especially as it impressively shows us how seeing is the primary medium of social life and materially integrates the body of the individual and the body of the group. Morgan is unquestionably the pioneering theorist in the whole emergent field of Visual and Culture Studies as it relates to religion and art. Norman Girardot, University Distinguished Professor, Lehigh University. Under David Morgan's inspiring guidance, readers are taken on a dazzling journey through religious images that mediate worlds of faith. Embedding vision in the body, this book stands out with its thought-provoking approach to religious media as material and embodied interfaces that underpin the social construction of the sacred. Birgit Meyer, Professor of Religious Studies, Utrecht University.

Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States Ravinder Mamtani, Albert B. Lowenfels, 2018-01-02 This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries: Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait, and Bahrain. These countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to wealthy petro-states today. Their healthcare systems, however, are only now beginning to catch up. Rapid changes to the population and lifestyles of the GCC states have completely changed and challenged the region's health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new

trends have developed increasingly lifestyle or wealthy country diseases such as diabetes heart disease and cancer have replaced the old maladies To meet these emerging healthcare needs GCC states require highly trained and skilled healthcare workers an environment that supports local training state of the art diagnostic laboratories and hospitals research production and dissemination and knowledge acquisition They face shortages in most if not all of these areas This book provides a comprehensive study of the rapidly changing health profile of the region the existing conditions of healthcare systems and the challenges posed to healthcare management across the six states of the GCC

international human rights law and the law of the World Trade Organization in addressing cyber espionage This monograph also examines whether developments in customary international law have carved out espionage exceptions to those international legal rules that otherwise prohibit cyber espionage as well as considering whether the doctrines of self defence and necessity can be invoked to justify cyber espionage Notwithstanding the applicability of international law this monograph concludes that policymakers should nevertheless devise an international law of espionage which as *lex specialis* contains rules that are specifically designed to confront the growing threat posed by cyber espionage **Limba română** ,2005
