**Get Ready! For Standardized Tests : Math Grade 2** Kristin B. Swanson, Carol

Turkington,2001-07-05 One of the areas of study students find most difficult to master and are most fearful of is math Yet the core math skills acquired in the first four years of school form the basis of all future academic success Get Ready for Standardized Tests the first and only grade specific test prep series now features hands on guidance on helping kids master the all important basic math skills while arming parents with the tools they need to help their children succeed *Research and Evaluation in Education and Psychology* Donna M. Mertens,2014-03-06 Focused on increasing the credibility of research and evaluation the Fourth Edition of Donna M Mertens s comprehensive *Research and Evaluation in Education and Psychology* Integrating Diversity with Quantitative Qualitative and Mixed Methods incorporates the viewpoints of various research paradigms into its descriptions of these methods Providing specific advice on conducting research in culturally complex communities the new edition has been updated to align with the American Psychological Association and the National Council of Accreditation of Teacher Education accreditation requirements Approximately sixty percent of the content in the Fourth Edition is new updated with numerous contemporary examples making this book one of the most comprehensive accessible and practical methods books available Praise for the previous edition The organization of the text reflects the author s intent philosophy and objectives Mertens clearly presents approaches descriptions and many examples useful in conducting studies she is to be commended for the thoroughness of her work Frank D Adams Wayne State College Excellent descriptions definitions examples and narrative about social science theory and the various paradigms Mertens use of a wide variety of social identities to provide her examples makes the text inclusive of a variety of diverse identities It is also useful to see the differences between research and evaluation and to select methods appropriate to the intention of the inquiry Katrina L Rodriguez University of Northern Colorado **The Black-White Test Score Gap** Christopher Jencks,Meredith Phillips,2011-01-01 The test score gap between blacks and whites on vocabulary reading and math tests as well as on tests that claim to measure scholastic aptitude and intelligence is large enough to have far reaching social and economic consequences In their introduction to this book Christopher Jencks and Meredith Phillips argue that eliminating the disparity would dramatically reduce economic and educational inequality between blacks and whites Indeed they think that closing the gap would do more to promote racial equality than any other strategy now under serious discussion The book offers a comprehensive look at the factors that contribute to the test score gap and discusses options for substantially reducing it Although significant attempts have been made over the past three decades to shrink the test score gap including increased funding for predominantly black schools desegregation of southern schools and programs to alleviate poverty the median black American still scores below 75 percent of American whites on most standardized tests The book brings together recent evidence on some of the most controversial and puzzling aspects of the test score debate including the role of test bias heredity and family background It also looks at how and why the gap has changed over the past generation reviews the educational psychological and cultural explanations for the gap and analyzes its educational and economic consequences

The authors demonstrate that traditional explanations account for only a small part of the black white test score gap They argue that this is partly because traditional explanations have put too much emphasis on racial disparities in economic resources both in homes and in schools and on demographic factors like family structure They say that successful theories will put more emphasis on psychological and cultural factors such as the way black and white parents teach their children to deal with things they do not know or understand and the way black and white children respond to the same classroom experiences Finally they call for large scale experiments to determine the effects of schools racial mix class size ability grouping and other policies In addition to the editors the contributors include Claude Steele Ronald Ferguson William G Bowen Philip Cook and William Julius Wilson     The Relation of Class Size to Student Achievement Anissa Lynn Cravens,2006     **California.
