Environmental Contexts And Disability 8 Research In Social Science And Disability:

Disability, Intersectional Agency, and Latinx Identity Alexis Padilla, 2021-07-28 This interdisciplinary volume links disability and agency by exploring LatDisCrit's theory and activist emancipatory practice. It uses the author's experiential and analytical views as a blind brown Latinx engaged scholar and activist from the global south living and struggling in the highly racialized global north context of the United States. LatDisCrit integrates critically LatCrit and DisCrit which look at the interplay of race, ethnicity, diasporic cultures, historical sociopolitics, and disability within multiple Latinx identities in mostly global north contexts while incorporating global south epistemologies. Using intersectional analysis of key concepts through critical counterstories following critical race theory, methodological traditions, and engaging possible decoloniality, treatments of material precarity and agency, this book emphasizes intersectionality's complex underpinnings within and beyond Latinidades. Through a careful interplay of disability, identity, and disability rights empowerment, the volume opens avenues for intersectional solidarity and spaces for radical transformational learning. This book will be of interest to all scholars and students working in disability studies, intersectional disability justice, activists, critical Latinx/Chicanx studies, critical geographies, intersectional political philosophy, and political and public sociology. *The Routledge International Handbook of Disability Human Rights Hierarchies*

Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31 Disability is defined by hierarchy. Regardless of culture or context, persons with disabilities are almost always pushed to the bottom of the social hierarchy. With the advent of the Convention on the Rights of Persons with Disabilities 2006, disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally. Despite important progress, the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes. Certain groups of persons with disabilities have gained new voices while others remain silenced, and certain rights are prioritized over others depending on what states, international organizations, or advocates want rather than what those on the ground need most. This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread, implementation, and protection of disability human rights. The enjoyment of human rights is not equal, nor is the recognition of specific individuals and groups' rights. In order to change this situation, inequalities across the disability human rights movement must be explored. Divided into five parts: Who counts as disabled? Political, social, and cultural context; Which rights on top, whose rights on bottom? Pushed to the periphery in the disability rights movement; Representations of disability, and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean, Bangladesh, Bosnia/Herzegovina, China, Ghana, Haiti, Hungary, India, Israel, Kenya, Latin America, Poland, Russia, Scotland, Serbia, and South Africa, and other countries, this book will be of interest to all scholars and students of disability studies, sociology, human rights, law, and social policy. *Metanarratives of*

Disability David Bolt, 2021-05-26 This book explores multiple metanarratives of disability to introduce and investigate the critical concept of assumed authority and the normative social order from which it derives The book comprises 15 chapters developed across three parts and informed by disability studies is authored by those with research interests in the condition on which they focus as well as direct or intimate experiential knowledge When out and about many disabled people know only too well what it is to be erroneously told the error of our their ways by non disabled passers by assumed authority often cloaked in helpfulness Showing that assumed authority is underpinned by a displacement of personal narratives in favour of overarching metanarratives of disability that find currency in a diverse multiplicity of cultural representations ranging from literature to film television advertising social media comics art and music this work discusses how this relates to a range of disabilities and chronic conditions including blindness autism Down syndrome diabetes cancer and HIV and AIDS Metanarratives of Disability will be of interest to all scholars and students of disability studies medical sociology medical humanities education studies cultural studies and health offers a well structured accessible collection of disability narratives that foreground disabled voices *Journal of Literary and Cultural Disability Studies* 16 1 2022

Perspectives on Disability and Rehabilitation Karen Whalley Hammell, 2006-02-22 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Occupational Therapy eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title The book provides an accessible introduction to many of the current theoretical perspectives on disability enabling readers to challenge the taken for granted nature of traditional knowledge and assumptions within the rehabilitation health and community care industries and encouraging a

more critical approach both to the nature of rehabilitation following injury or illness and to the problem of physical difference and disability Through its interrogation and exploration of new theoretical perspectives on disability and rehabilitation this book provides a unique text for students and practitioners of nursing occupational therapy physiotherapy and social work and for educators and researchers in these fields Although rehabilitation practitioners claim to aspire to client centred practice and advocate participatory modes of research rehabilitation theory remains curiously estranged both from theoretical perspectives developed by disabled disability theorists and from critical perspectives on disability that are emerging from other academic disciplines Thus immune from alternate views rehabilitation practitioners fail to question the premise that their professional assumptions are correct or right Contemporary theorists raise important questions for example about professional power concepts of normality independence and the physical body issues central to rehabilitation as well as to the role of the cultural environment in producing prejudice the role of the social environment in creating disadvantage and to issues of power and privilege and of the systemic oppression of disabled people This book provides an introduction to the expanding body of critical work on disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner s approach to rehabilitation Relevant for all the rehabilitation and health care professions Disability and Culture
