Middle School Life Science Judy Capra, 1999-08-23 Middle School Life Science Teacher's Guide is easy to use. The new design features tabbed loose sheets which come in a stand up box that fits neatly on a bookshelf. It is divided into units and chapters so that you may use only what you need. Instead of always transporting a large book or binder or box you may take only the pages you need and place them in a separate binder or folder. Teachers can also share materials. While one is teaching a particular chapter another may use the same resource material to teach a different chapter. It's simple, it's convenient.

Disease & Health Edward P. Ortley, Richard Cadice, 1993-09-01 Color Overheads Included. This book represents a program of basic studies dealing with disease and health. The nature of disease and types of diseases including both non-communicable and communicable diseases are detailed. Information is provided on substance abuse and its effects on the human body. Each of the twelve teaching units in this book is introduced by a color transparency which emphasizes the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow up activities. The teaching guide offers descriptions of the basic concepts to be presented, background information, suggestions for enrichment activities and a complete answer key.
