Heather Heying,Bret Weinstein,2021-09-14 A bold provocative history of our species finds the roots of civilization s success and failure in our evolutionary biology We are living through the most prosperous age in all of human history yet people are more listless divided and miserable than ever Wealth and comfort are unparalleled and yet our political landscape grows ever more toxic and rates of suicide loneliness and chronic illness continue to skyrocket How do we explain the gap between these two truths What s more what can we do to close it For evolutionary biologists Heather Heying and Bret Weinstein the cause of our woes is clear the modern world is out of sync with our ancient brains and bodies We evolved to live in clans but today most people don t even know their neighbors names Traditional gender roles once served a necessary evolutionary purpose but today we dismiss them as regressive The cognitive dissonance spawned by trying to live in a society we re not built for is killing us In this book Heying and Weinstein cut through the politically fraught discourse surrounding issues like sex gender diet parenting sleep education and more to outline a provocative science based worldview that will empower you to live a better wiser life They distill more than 20 years of research and first hand accounts from the most biodiverse ecosystems on Earth into straight forward principles and guidance for confronting our culture of hyper novelty

## **A Hunter-Gatherer's Guide to the 21st Century**

Heather Heying,Bret Weinstein,2021-09-14 A provocative exploration of the tension between

our evolutionary history and our modern woes and what we can do about it We are living through the most prosperous age in all of human history yet we are listless divided and miserable Wealth and comfort are unparalleled but our political landscape is unmoored and rates of suicide lone liness and chronic illness continue to skyrocket How do we explain the gap between these truths And how should we respond For evolutionary biologists Heather Heying and Bret Weinstein the cause of our troubles is clear the accelerat ing rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt We evolved to live in clans but today many people don t even know their neighbors names In our haste to discard outdated gender roles we increasingly deny the flesh and blood realities of sex and its ancient roots The cognitive dissonance spawned by trying to live in a society we are not built for is killing us In this book Heying and Weinstein draw on decades of their work teaching in college classrooms and explor ing Earth s most biodiverse ecosystems to confront today s pressing social ills from widespread sleep deprivation and dangerous diets to damaging parenting styles and back ward education practices Asking the questions many mod ern people are afraid to ask A Hunter Gatherer s Guide to the 21st Century outlines a science based worldview that will empower you to live a better wiser life

**Teaching Information Fluency** Carl Heine,Dennis O'Connor,2013-11-14 Teaching Information Fluency describes the skills and dispositions of information fluency adept searchers Readers will receive in depth information on what it takes to locate evaluate and ethically use digital information The book realistically examines the abilities of Internet searchers today in terms of their efficiency and effectiveness in finding online information evaluating it and using it ethically Since the majority of people

develop these skills on their own rather than being taught the strategies they invent may suffice for simple searches but for more complex tasks such as those required by academic and professional work the average person's performance is adequate only about 50% of the time. The book is laid out in five parts: an introduction to the problem and how search engine improvements are not sufficient to be of real help; speculative searching; investigative searching; ethical use and applications of information fluency. The intent of the book is to provide readers ways to improve their performance as consumers of digital information and to help teachers devise useful ways to integrate information fluency instruction into their teaching since deliberate instruction is needed to develop fluency. Since it is unlikely that dedicated class time will be available for such instruction, the approach taken embeds information fluency activities into classroom instruction in language arts, history and science. Numerous model lessons and resources are woven into the fabric of the text, including think alouds, individual and group search challenges, discussions, assessments and curation, all targeted to Common Core State Standards as well as information fluency competencies.
