Lapp,Charles-Edward Amory Winslow,Frank Leslie Rector,1927 **Understanding Options for Agricultural Production**
G.Y. Tsuji,G. Hoogenboom,P.K. Thornton,2013-03-14 The first premise of this book is that farmers need access to options for
improving their situation In agricultural terms these options might be management alternatives or different crops to grow
that can stabilize or increase household income that reduce soil degradation and dependence on off farm inputs or that
exploit local market opportunities Farmers need a facilitating environment in which affordable credit is available if needed in
which policies are conducive to judicious management of natural resources and in which costs and prices of production are
stable Another key ingredient of this facilitating environment is information an understanding of which options are viable
how these operate at the farm level and what their impact may be on the things that farmers perceive as being important The
second premise is that systems analysis and simulation have an important role to play in fostering this understanding of
options traditional field experimentation being time consuming and costly This book summarizes the activities of the
International Benchmark Sites Network for Agrotechnology Transfer IBSNAT project an international initiative funded by the
United States Agency for International Development USAID IBSNAT was an attempt to demonstrate the effectiveness of
understanding options through systems analysis and simulation for the ultimate benefit of farm households in the tropics and
subtropics The idea for the book was first suggested at one of the last IBSNAT group meetings held at the University of
