**Ecology** Susan Hayward,2020-03-17 Using the Regenerative economic model also known as Doughnut Economics Susan Hayward offers a thought provoking sketch for a renewed tentatively revolutionary approach to both film theory and film practice This book attempts to answer the questions posed by T J Demos in Against the Anthropocene 2017 how do we find a

way to address planetary harm and the issues it raises within the field of Film Studies How do we construct a theoretical model that allows us to visualize the ecological transgressions brought about by the growth model of capitalism which is heavily endorsed by mainstream narrative cinema By turning to the model set out in Kate Raworth s book Doughnut Economics 2017 and adapting its fundamental principles to a study of narrative cinema Film Ecology proposes to show how by using this model we can usefully plot and investigate films according to criteria that are not genre star auteur led nor indeed embedded in anthropocentric theoretical models but principles which are ecologically based These arguments are brought to life with examples from mainstream narrative films such as The Giant 1956 Mildred Pierce 1945 Erin Brockovich 2000 Wall Street 1987 Hotel Rwanda 2004 and Missing Figures 2016 This approach will inspire film practitioners film theorists critics and analysts film students and film lovers alike to consider how they might integrate this Doughnut model into their thinking or work as part of their process
