Cross-Border Resource Management Rongxing Guo, 2012-12-31 In discussing theoretical and analytical issues relating to cross border resource management this book explores a group of geographical political legal economic and cultural factors that arise when political units such as sovereign countries dependent states and other administrative units seek to maximize their political and economic interests while minimizing the resultant damage e g resource degradation and preservation of the physical

environment The book is organized into three parts Part one discusses the theoretical issues relating to cross border development and the cross border management of natural and environmental resources Part two provides a variety of alternatives to advancing cross border development as well as of options for cross border management of resource exploitation and for cross border conflict management In Part three using the theoretical and methodological frameworks that have been discussed in Parts one and two respectively two in depth case studies on cross border development and resource management are provided Examines various types of cross border areas at both international and sub national levels throughout the world as well as their geographical political economic and cultural influences on the cross border resource management Uses the latest international and area data resulting in new findings for cross border environmental activities Contains numerous case studies throughout the world including in depth case studies of cross border resource management

Rethinking Authority in China's Border Regime Franziska Plümmer, 2025-10-01 In the 21st century governments around the globe are faced with the question on how to tackle new migratory mobilities Governments increasingly become aware of irregular immigration and are forced to re negotiate the dilemma of open but secure borders Rethinking Authority in China's Border Regime Regulating the Irregular investigates the Chinese government's response to this phenomenon Hence this book presents a comprehensive analysis of the Chinese border regime It explores the regulatory framework of border mobility in China by analysing laws institutions and discourses as part of an ethnographic border regime analysis It argues that the Chinese state deliberately creates zones of exception along its border In these zones local governments function as scalar managers that establish cross border relations to facilitate cross border mobility and create local migration systems that build on their own notion of legality by issuing locally valid border documents The book presents an empirically rich story of how border politics are implemented and theoretically contributes to debates on territoriality and sovereignty as well as to the question of how authority is exerted through border management Empirically the analysis builds on two case studies at the Sino Myanmar and Sino North Korean borders to illustrate how local practices are embedded in multiscale mobility regulation including regional organizations such as the Greater Mekong Subregion and the Greater Tumen Initiative
