Mediterranean Island Landscapes Ioannis N. Vogiatzakis, Gloria Pungetti, A.M. Mannion, 2008-02-26 Mediterranean islands exhibit many similarities in their biotic ecological physical and environmental characteristics There are also many differences in terms of their human colonization and current anthropogenic pressures This book addresses in three sections these characteristics and examines the major environmental changes that the islands experienced during the Quaternary period The first section provides details on natural and cultural factors which have shaped island landscapes It describes the environmental and cultural changes of the Holocene and their effects on biota as well as on the current human pressures that are now threats to the sustainability of the island communities The second section focuses on the landscapes of the largest islands namely Sicily Sardinia Corsica Cyprus Crete Malta and the Balearics Each island chapter includes a special topic reflecting a particular characteristic of the island Part three presents strategies for action towards sustainability in Mediterranean islands and concludes with a comparison between the largest islands Despite several published books on Mediterranean ecosystems landscapes there is no existing book dealing with Mediterranean islands in a collective manner Students researchers and university lecturers in environmental science geography biology and ecology will find this work invaluable as a cross disciplinary text while planners and politicians will welcome the succinct summaries as background material to planning decisions *Ecological Landscape Design and Planning* Jala Makhzoumi, Gloria Pungetti, 2003-09-02

The authors of this book offer an holistic methodological approach to the design and planning of landscape based on both research and practical experience **Principles and Methods in Landscape Ecology** A. Farina, 2013-04-17 Currently considered a bridge between basic and Two possibilities exist to expand landscape ecol applied ecology landscape ecology occupies an ogy one consists of developing new research and important new niche in ecology representing a new the other in developing a good educational frame star in the galaxy of the ecological sciences work Both are important and not in conflict In this However the broad spectrum of conceptual and spirit I have prepared this book with the aim of methodological approaches has created a non summarizing the best theories concepts principles focused science strongly influenced by the more and methods in landscape ecology It is an attempt dominant disciplines such as landscape planning to reinforce the ecological research perspective to and restoration forest management landscape consolidate principles and methods validate

proce architecture etc dures and reconcile different positions including The uncertain position of landscape ecology the geobotanic animal and human perspectives among the ecological disciplines is in contradiction The concept is very simple I have no ambition with the general recognition that landscape is a spa to present new ideas and theories I have worked to tial dimension in which important ecological create a tool mainly for classroom use but also processes occur and landscape is becoming very appealing to a broad range of scientists and practi popular in many ecology related fields from plant tioners dealing with landscape ecology and its disease to animal behaviour problems

5th International Congress on , Biodiversity Adriano Sofo,2011-10-10

Biodiversity is strongly affected by the rapid and accelerating changes in the global climate which largely stem from human activity Anthropogenic activities are causing highly influential impacts on species persistence The sustained environmental change wildlife is experiencing may surpass the capacity of developmental genetic and demographic mechanisms that populations have developed to deal with these alterations How biodiversity is perceived and maintained affects ecosystem functioning as well as how the goods and services that ecosystems provide to humans can be used Recognizing biodiversity is

essential to preserve wildlife Furthermore the measure management and protection of ecosystem biodiversity requires different and innovative approaches For all these reasons the aim of the present book is to give an up to date overview of the studies on biodiversity at all levels in order to better understand the dynamics and the mechanisms at the basis of the richness of life forms both in terrestrial including agro ecosystems and marine environments

L'identità culturale del paesaggio mediterraneo. Risorse, processo e strategie sostenibili Vincenzo Calvanese,2009 *Cultural Landscapes of Universal Value* Bernd von Droste,Harald Plachter,Michthild Rößler,1995 Cultural landscapes are at the interface between nature and culture They represent the permanent interaction between humans and their environment shaping the surface of the earth With the rapid social and economic development cultural landscapes belong to the most fragile and threatened sites on earth Adapted protection and proper management is urgently needed Since 1992 outstanding cultural landscapes can be protected under the World Heritage Convention Thus the World Heritage Convention is the first international legal instrument recognizing and safeguarding this type of property for future generations This important step has led to enhanced international and national recognition The present volume aims to contribute to enhanced protection and management of cultural landscapes around the world It furthermore highlights in a truly interdisciplinary approach some of the most outstanding cultural landscapes of universal value in their geocultural and environmental context
