The Hacked World Order Adam Segal, 2016-02-23 For more than three hundred years the world wrestled with conflicts that arose between nation states. Nation states wielded military force, financial pressure, and diplomatic persuasion to create world order. Even after the end of the Cold War, the elements comprising world order remained essentially unchanged. But 2012 marked a transformation in geopolitics, and the tactics of both the established powers and smaller entities looking to challenge the international community. That year, the US government revealed its involvement in Operation Olympic Games, a mission aimed at disrupting the Iranian nuclear program through cyberattacks. Russia and China conducted massive cyber espionage operations, and the world split over the governance of the Internet. Cyberspace became a battlefield. Cyber conflict is hard to track, often delivered by proxies, and has outcomes that are hard to gauge. It demands that the rules of engagement be completely reworked and all the old niceties of diplomacy be recast. Many of the critical resources of statecraft are now in the hands of the private sector, giant technology companies, in particular. In this new world order, cybersecurity expert Adam Segal reveals power has been well and truly hacked.

Traffic Mining Applied to Police Activities Fabio Leuzzi, Stefano Ferilli, 2018-03-21 This book presents high quality original contributions on the development of automatic traffic analysis systems that are able to not only anticipate traffic scenarios but also understand the behavior of road users: vehicles, bikes, trucks, etc. in order to provide better traffic management, prevent accidents, and potentially identify criminal behaviors. Topics also include traffic surveillance and vehicle accident analysis using formal concept analysis, convolutional and recurrent neural networks, unsupervised learning, and process mining. The content is based on papers presented at the 1st Italian Conference for the Traffic Police TRAP, which was held in Rome in October 2017. This conference represents a targeted response to the challenges facing the police in connection with managing massive traffic data, finding patterns from historical datasets, and analyzing complex traffic phenomena in order to anticipate potential criminal behaviors. The book will appeal to researchers, practitioners, and decision makers interested in traffic monitoring and analysis, traffic modeling and simulation, mobility, and social data mining, as well as members of the police.

Smart Cities Cybersecurity and Privacy Danda B. Rawat, Kayhan Zrar Ghafoor, 2018-12-04 Smart Cities Cybersecurity and Privacy examines the latest research developments and their outcomes for safe, secure, and trusting smart cities. Smart cities improve the quality of life of citizens in their energy and water usage, healthcare, environmental impact, transportation needs, and many other critical city services. Recent advances in hardware and software have fueled the rapid growth and deployment of ubiquitous connectivity between a city's physical and cyber components. This connectivity, however, also opens up many security vulnerabilities that must be mitigated. Smart Cities Cybersecurity and Privacy helps researchers, engineers, and city planners develop adaptive, robust, scalable, and reliable security and privacy smart city applications that can mitigate the negative implications associated with cyber attacks and potential privacy invasion. It provides insights into networking and security architectures, designs, and

models for the secure operation of smart city applications Consolidates in one place state of the art academic and industry research Provides a holistic and systematic framework for design evaluating and deploying the latest security solutions for smart cities Improves understanding and collaboration among all smart city stakeholders to develop more secure smart city architectures
