

## Fact Sheet: Medicaid Level of Care Determination

### What is the Medicaid Planning Facility Level of Care Determination (LOCOP)?

The Level of Care Determination (LOCOP) is the process the Missouri Medicaid program uses to decide if a person needs the level of care provided in a nursing home or other services of their choosing. (See Choices and PACE that help develop after-mid-life long-term care that doesn't require a nursing home.)

### What are the services used in LOCOP?

- Medicaid or person's account for a nursing home, the ATC Choices program, or the Program for All-Inclusive Care for the Elderly (PACE) and Homeless Individuals for care that fits their long-term care needs.
- Medicaid or person's attorney-in-fact or Interim Power of Attorney for Health Care.
- Medicaid or person's hospital impressions, or health insurance company documents.

### How does a person qualify for Medicaid services?

The LOCOP looks at a person's abilities in seven areas. These areas are referred to as "domains". The areas include how the person manages daily activities like getting in and out of bed, using the bathroom, and eating. It also considers whether the person has short-term memory loss, needs help in making decisions, or has certain symptoms or medical conditions. If a person meets the requirements, they can get off other long-term care, like ATC Choices, PACE, or Homeless Individuals services.

### What if a person does not qualify under one of the seven areas?

If you think you need nursing home care for anyone from ATC Choices or PACE but don't qualify, you don't qualify under one of the seven areas. These are three options:
