Technology has had a huge impact on education and social dynamics around the world Since the introduction of information and communication technologies ICTs such as the internet smartphones and social media much has changed in the way we learn and interact with others In education technology has enabled students and teachers to access more diverse and engaging educational resources With internet access students and teachers can access educational resources from all over the world and learn about various topics and disciplines In addition technology also enables distance learning which allows students and teachers to connect from different locations However there are also negative impacts of using technology in education For example excessive use of social media and the internet can cause concentration disorders and addiction in students In addition too much reliance on technology can also reduce students ability to think critically and solve problems independently In social dynamics technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange However technology has also brought negative impacts on social dynamics such as the spread of fake news or hoaxes cyberbullying and social media addiction In this regard technology can be a very useful tool if used wisely and with proper understanding of its impact Therefore to support this Universitas PGRI Yogyakarta was hold an international conference and Call for Papers The 2nd UPY International Conference on Education and Social Science UPINCESS The Impact of Technology on Education and Social Dynamics on September 27 2023 The conference aims to discuss in depth about the impact of technology on education and social dynamics as well as finding appropriate solutions and strategies to minimize its negative impact and maximize its benefits Experts researchers and practitioners in the field of education and technology from around the world can share their knowledge and experience in this conference and can encourage collaboration and innovation in this field

Executive Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes

that are central to goal directed behavior thoughts and emotions. These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment. The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child's social contexts especially the home and school. Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting, planning and organizing in academic success. Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators. The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success.

The Boy Crisis Warren Farrell, John Gray, 2018-03-13

What is the boy crisis? It's a crisis of education. Worldwide boys are 50 percent less likely than girls to meet basic proficiency in reading, math and science. It's a crisis of mental health. ADHD is on the rise. And as boys become young men, their suicide rates go from equal to girls to six times that of young women. It's a crisis of fathering. Boys are growing up with less involved fathers and are more likely to drop out of school, drink, do drugs, become delinquent and end up in prison. It's a crisis of purpose. Boys' old sense of purpose being a warrior, a leader or a sole breadwinner are fading. Many bright boys are experiencing a purpose void, feeling alienated, withdrawn and addicted to immediate gratification.

So what is The Boy Crisis? A comprehensive blueprint for what parents, teachers and policymakers can do to help our sons become happier, healthier men and fathers and leaders worthy of our respect.

The Education Invasion Joy Pullmann, 2017-03-14

Most Americans had no idea what Common Core was in 2013 according to polls. But it had been creeping into schools nationwide over the previous three years and children were feeling its effects. They cried over math homework so mystifying their parents could not help them even in elementary school. They read motley assortments of informational text instead of classic literature. They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms. How did this latest and most sweeping reform of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it. Why then was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self governance?

in education so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies **Educational Choices, Transitions and Aspirations in Europe** Aina Tarabini,Nicola Ingram,2018-06-13 Educational Choices Transitions and Aspirations in Europe analyses educational choices and transitions in eight different European countries regions and provides an engaging means of considering issues of inequality through international comparisons The book is underpinned by explorations of theoretical perspectives and methodological approaches which share the common goal of highlighting and challenging educational inequalities in relation to political imaginings and discursive constructions of notions of aspirations and choice Beginning with an overview of the theoretical landscape the book posits ways of understanding transitional experiences through both a social and a political lens Comprising of chapters that explore these issues within the context of specific countries and at different stages of young people's transitions the collection examines the features of different European education systems and how they frame transitions and choices before providing an overall analysis of systemic institutional and subjective constraints on these processes The book uniquely opens and develops an intellectual conversation about different education systems with similar educational challenges and outcomes Assimilating key issues and solutions this volume also makes general recommendations for policy and practice that would help to promote greater equity and social justice The book covers a range of transition points and countries which should make it essential reading for academics researchers and postgraduate students with an interest in international perspectives on education It will be particularly useful for those working in education sociology social policy geography and politics
