Respect for Teachers Brian Ford, 2012-12-27 For over 30 years we have been in the

midst of a paradox Following a questionable logic that sees education as a means to economic ends efforts to reform education have focused on keeping the US from slipping in international economic competition Relying on testing as a standard in the end we may have decreased our human potential and become less competitive Our system has gotten worse at its core in its philosophical tenets and in its ultimate effects by placing unwonted pressure on our youth and in stifling their creativity While this goes back decades Respect for Teachers takes its title from a phrase perhaps a codeword in President s 2011 State of the Union address and sits down to consider its implications Connecting attacks on teachers unions and schools and the misrepresentation of research to the promotion of new economic models in education it suggests that the Obama administration may be without quite realizing it setting the stage for rapid privatization of the public system As this endangers the egalitarian basis of democracy it also reminds us that schooling is big business many trillions of dollars world wide Joseph Schumpeter once said No bourgeoisie ever disliked war profits Respect operates under the premise that no bourgeoisie ever disliked the spoils of school reform either School World Order John Adam Klyczek,2019-10-11 For more than twenty years Charlotte Thomson Iserbyt has been warning the American people of the New World Order stratagem to overthrow democratically elected school boards with public private partnerships between the federal government and globalist corporations In this volume John Klyczek expounds on Iserbyt s theories by tracing her work to the present moment as a last ditch effort to stop the corporatization of education Klyczek explores how the infamous Yale Secret Society Skull and Bones utilized Robber Baron philanthropy and stimulus response psychological conditioning to institute a corporatist system of workforce training for a fascistically planned economy He then explains how this system is being upgraded to a technocratic education system of corporatist school choice through virtual education technologies that program students for a globally planned economy School World Order will teach you the ulterior agenda behind the ed tech movement data mining students for research and development into artificial intelligence and transhumanist biotechnologies for the establishment of an authoritarian post human society Thorium Energy for the World Jean-Pierre Revol,Maurice Bourquin,Yacine Kadi,Egil Lillestol,Jean-Christophe de Mestral,Karel Samec,2016-04-05 The Thorium Energy Conference ThEC13 gathered some of the world s leading experts on thorium technologies to review the possibility of destroying nuclear waste in the short term and replacing the uranium fuel cycle in nuclear systems with the thorium fuel cycle in the long term The latter would provide abundant reliable and safe energy with no CO2 production no air pollution and minimal waste production The participants representatives of 30 countries included Carlo Rubbia Nobel Prize Laureate in physics and inventor of the Energy Amplifier Jack Steinberger Nobel Prize Laureate in physics Hans Blix former Director General of the International Atomic Energy Agency IAEA Rolf Heuer Director General of CERN Pascal Couchepin former President of the Swiss Confederation and Claude Haegi President of the FEDRE to name just a few The ThEC13 proceedings are a source of reference on the use of thorium for energy generation They offer detailed technical reviews of the status of thorium energy technologies from basic
