Critical Issues and Bold Visions for Science Education contains 16 chapters written by 32 authors from 11 countries. The book is intended for a broad audience of teachers, teacher educators, researchers, and policymakers. Interesting perspectives, challenging problems, and fresh solutions grounded in cutting edge theory and research are presented, interrogated, elaborated, and while retaining complexity, offer transformative visions within a context of political tensions, historical legacies, and grand challenges associated with the Anthropocene, e.g., sustainability, climate change, mass extinctions. Within overarching sociocultural frameworks, authors address diverse critical issues using rich theoretical frameworks and methodologies suited to research today and a necessity to make a difference while ensuring that all participants benefit from research and high standards of ethical conduct. The focus of education is broad, encompassing teaching, learning, and curriculum in pre-K-12 schools, museums, and other informal institutions, community gardens, and cheerworld. Teaching and learning are considered for a wide range of ages, languages, and nationalities. An important stance that permeates the book is that research is an activity from which all participants learn, benefit, and transform personal and community practices. Transformation is an integral part of research in science education. Contributors are Jennifer Adams, Arnau Amat, Lucy Avraamidou, Marc lia Elis Barcellos, Alberto Bellocchi, Mitch Bleier, Lynn A.
